HANDS-ON SPINE SURGERY COURSE – Pre-Congress Workshop – World Spine 11

An intensive two-day **cadaver-based spine surgery training** designed to provide true operative experience under realistic conditions.

Core focus:

High-quality cadaver dissection

- Training on anatomical specimens prepared using the **Fix for Life®** method
- Preserved natural tissue texture and anatomical realism
- Authentic tactile feedback comparable to live surgery
- Clear intraoperative anatomical orientation

Structured hands-on setup

- 18 fully equipped dissection stations
- 3 participants per specimen
- Close supervision by experienced spine neurosurgeons

Surgical spectrum

- Open cervical, thoracic, lumbar and lumbosacral approaches
- Minimally invasive techniques (XLIF, TLIF)
- Endoscopic procedures
(full-endoscopic and tubular approaches)

Participants gain:

- Real dissection experience
- Improved anatomical confidence
- Refined surgical workflow
- Direct technical exchange with international experts

This course is centered on cadaver-based surgical training — providing realistic anatomy, controlled learning, and operative precision.

Dear colleagues,

The Pre-Congress Workshop World Spine 11 offers an intensive hands-on training experience on cadaver specimens, designed to give participants direct, practical exposure to key spine surgery techniques. With a deliberately small number of participants per station, the course ensures close supervision, am-

ple individual practice time, and high-quality interaction with a renowned international faculty. This focused, skills-oriented format provides an ideal environment to refine surgical technique and prepare for the main congress program.

Sincerely yours,
